Re: EU RoHS compliance

Dear Valued Customer,

All catalog Thermoelectric Cooling (TEC) modules manufactured and sold by Melcor are in compliance with EU RoHS directives. Per European Union RoHS directives, parts should contain:

- Less than 0.01% by weight (100 PPM) of Cadmium (Cd)
- Less than 0.1% by weight (1000 PPM) of Lead (Pb)
- Less than 0.1% by weight (1000 PPM) of Hexavalent Chromium (Cr VI)
- Less than 0.1% by weight (1000 PPM) of Mercury (Hg)
- Less than 0.1% by weight (1000 PPM) of Polybrominated Biphenyls (PBB)
- Less than 0.1% by weight (1000 PPM) of Polybrominated Diphenyl Ethers (PBDE)

Special custom TECs, using customer supplied or specified parts, may require individual analysis to verify compliance with the EU directive.

Regards,

Robert Smythe
